

Thieves®

Product Summary

Recognizing the hazard of using dangerous chemical-based products in the home, Young Living created a line of natural household products packed with the power and protection of Thieves. From toothpaste and mouthwash to cleaning products, hand soaps, and even throat lozenges, the Thieves product line provides safe, natural alternatives for use in the home.

Product Story

Young Living's Thieves essential oil blend was created based on the historical tale of four thieves in France who protected themselves from the black plague with cloves, rosemary, and other aromatics while robbing victims of the killer disease. When captured, they were offered a lighter sentence in exchange for their secret recipe. In modern days, these same herbs and essential oils have been found to be an effective barrier against topical and airborne microorganisms.¹ Young Living's proprietary Thieves oil blend includes clove, cinnamon bark, rosemary, lemon, and Eucalyptus radiata and has been specially blended to offer the same kind of defense as it did in the fifteenth century. Thieves has been university tested and found to be highly effective in supporting the immune system and good health.*

Primary Benefits

The Thieves product line offers an array of natural household products that you can feel confident about using in your home. Because of the natural purifying ability of the essential oils contained in the Thieves blend, these products are effective without using harsh or synthetic chemicals like many other products on the market.

What Makes These Products Unique?

Every product in the Thieves line has been infused with pure, therapeutic-grade essential oils. Great care has been taken to ensure that each essential oil contained in Young Living's products meets the highest standard for purity and potency.
